

More Football...

Less COVID!!!

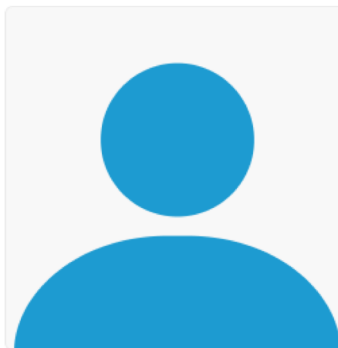

Who we are

Adam Jones
Design Lead &
Backend Dev

Charles Metzger
API Lead
Frontend Dev

Jake Simson
Backend Lead
Overall "fixer" of
bad code

Manuel Pierre
GitHub Project Lead &
Backend Dev

Want more football and less COVID?

Then our app is made for you!!!

What we do

We have seen how COVID has already impacted Baseball, Basketball, and Hockey seasons. The question everyone is asking is, will football happen this fall?

Just this week both the Big 10 and the Pac 12 cancelled their fall football seasons

To promote a safe alternative to outright canceling the NFL season, our app ties together data from multiple sources to provide tailored safety measures per NFL team in an attempt to mitigate COVID risk and hopefully allow for people to safely attend NFL games this fall

MFLC app gives our users

Connection to their
team's information via
powerful APIs

See your team's
COVID Risk based
on their city

Get relevant
information to
Stay Safe

More Football,
Less COVID!!!

Technology

Multiple APIs...

Connections with COVID data, Football data, and Geo-location data

Clean, responsive, and mobile first UI...

At home or at the game, our app is there to provide you the information exactly when you need it

Geo-location...

Once you get to the game, let us get you to your seat

FOOTBALL!!!
